Kudus, Central Java, Indonesia

I'm a one and a half-years Informatics Engineering student at Universitas Dian Nuswantoro. I have experience and am interested in various aspects of the field, ranging from machine learning, deep learning, artificial intelligence, cloud computing, operating systems, database systems, cyber security and the transformative Internet of Things. My passion for technology drives me to make a meaningful impact in the ever-evolving technology landscape.

Education

Universitas Dian Nuswantoro - Semarang, Indonesia

Sep 2024 - Sep 2028 (Expected)

Bachelor Degree in Informatics Engineering, 3.7/4.00

- GPA (major only): 3.7
- A part of "Excellence Class Batch 2024", which is a prestigious initiative aimed at bringing together the most accomplished students within the Informatics Engineering study program.
- Utilized the Naive Bayes algorithm to perform fine-grained sentiment analysis on the MBG Program Victims Sentiment Analysis dataset.
- Designed and implemented an e-voting system by applying cryptographic principles to ensure data security, ballot confidentiality, and the integrity of election results.
- Designed and implemented a health check system by applying Software Engineering principles, aimed at supporting healthcare services in 3T regions (underdeveloped, frontier, and outermost areas).
- Performed Linux Ubuntu operating system remastering to create an optimal working environment for web programmers, with customized configurations and tailored development tools.

SMK Raden Umar Said - Kudus, Indonesia

July 2021 - July 2024

High School Diploma in Software and Game Development

- Designed and implemented a real-time sports venue rental system featuring live availability tracking, booking management, and schedule synchronization.

Professional Experience

Can Creative - Semarang, Indonesia

Oct 2023 - Mar 2024

Mobile Developer

An organization affiliated with SMK Raden Umar Said Kudus, focusing on the development and management of digital systems to support academic and institutional activities.

- Developed and implemented multiple UI pages with a consistent design.
- Integrated data from APIs into the application.
- Optimized application performance through state management using Provider.

Organisational Experience

Himpunan Mahasiswa Teknik Informatika - Semarang, Indonesia

Oct 2025 - Now

Software Department

- Developed and maintained the official HMTI website to support organizational information dissemination and digital activities.
- Collaborated with other departments to gather requirements and translate organizational needs into functional web solutions.
- Ensured website performance, usability, and basic security best practices.

Himpunan Mahasiswa Teknik Informatika - Semarang, Indonesia

Aug -Des 2025

Bendahara - SEMNASTI 2025 (Seminar Teknik Informatika)

- Managed and controlled the event budget for SEMNASTI, including planning, allocation, and expense tracking.
- Prepared financial reports and accountability documents to ensure transparent and accurate fund management.
- Coordinated with the organizing committee to support smooth financial operations throughout the event.
- Handled financial administration, including payment processing, receipts, and documentation.
- Ensured all financial activities complied with organizational and event financial procedures.

Himpunan Mahasiswa Teknik Informatika - Semarang, Indonesia

Des - Feb 2026

Competition Coordinator - ITC 2026 (Informatics Technology Competition)

- Coordinated and managed the competition division for ITC 2026, including planning, execution, and evaluation of competition activities.
- Designed competition guidelines and technical regulations (juklak & juknis) to ensure fair and structured implementation.
- Coordinated with judges, committee members, and participants to ensure smooth competition operations.
- Managed participant registration and submission workflows, including administrative and technical requirements.
- Ensured competitions were conducted according to schedule, rules, and quality standards.

Skills, Achievements & Other Experience

- **Research Area of Interest :** Machine Learning, Mobile Development, Front End Devolpment
- **Course Taken :** Machine Learning Coursera, Belajar Dasar AI Dicoding
- **Programming Language:** Python, PHP, Dart, JavaScript
- **Algorithm:** Naive Bayes, K-Nearest Neighbors (K-NN)
- **Framework:** ReactJS, NextJS, Laravel, Bootstrap, TailwindCSS
- **CI/CD:** Git
- **Soft Skills:** Discipline, Fast Learner, Teamwork, Problem Solver, Working Under Pressure, Digital Mindset and Behaviour
